

**Program SFB 958 Interdisciplinary Lecture Series
20. and 21.3.2013**

Location: Lecture Hall

Institut für Chemie und Biochemie - Biochemie
Freie Universität Berlin
Thielallee 63
14195 Berlin

Wednesday, March 20th

8:30-10:00: Imaging cell polarity
(Prof. Schmoranzer)

Coffee break

10:15 – 11:45: Role of scaffolding processes in sensory signaling cascades
(Prof. Neuhaus)

Lunch

13:00 – 14:30: Molecular biology and regulation of subcellular targeting of
mammalian glucose transporters
(Prof. Schürmann)

Coffee break

14:45 – 16:15:
Mechanotransduction at the membrane, fundamental principles
(Prof. Lewin)

Thursday, March 21st

8:30 – 10:00: Latest developments in mass spectrometry - Targeted proteomics
(Dr. Weise)

Coffee break
